

### FEATURES:

- HDMI Male – VGA Female Adaptor + 3.5mm Audio + USB
- Black PVC Cable
- Fully Moulded

### DESCRIPTION:

The HDMI to VGA adaptor enables your HDMI supported computer to connect to a VGA supported display screen. Simply connect the HDMI end of the connector to your computer and plug your existing VGA cable from the display into the adaptor. This adaptor also features a 3.5mm Stereo socket to provide an audio signal for external speakers or speakers integrated into the display screen with a 3.5mm stereo input. A micro USB socket is also built into the unit to provide additional power, should it be required. 3.5mm stereo lead and USB leads supplied. This passive adaptor supports resolution up to 1080p@60Hz.
