WCF (Web Content Filtering) Subscriptions – *Please remember to state delivery email address with your order (yours or end user's)*

IMPORTANT NOTES: These are soft-copy (emailed) licences. When placing an order, please provide the delivery email address (yours or the end user's).

Note that the service which is activated will depend on the firmware running on your router. If the router is only old firmware, then the **Cyren WCF** service can be activated. If the router is running URL Reputation compatible firmware then you will have the option to activate the **URL Reputation** service

If you activate **Cyren WCF** on old firmware and then upgrade firmware then the service will automatically be upgraded to the **URL Reputation service**

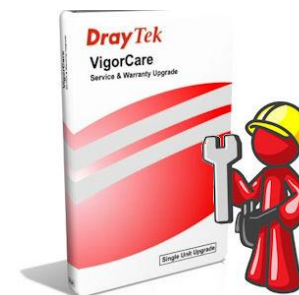

Please ensure that you order the right licence to match your router – check exact match on [web site](#).

VigorACS - Central Management Platform

UK Dealer Pricing – from 23th March 2019

VigorACS is DrayTek's central management system software. Many DrayTek dealers have adopted VigorACS for managing and monitoring their own or customers' estates of routers, wireless access points and switches, alerting them to any issues or having the comfort of confirming normal operation. VigorACS provides real-time visibility of your DrayTek estate, deploys common policies and the ability to deploy estate-wide firmware upgrades. VigorACS 3 supports all current DrayTek routers, access points and switches (exc. P1092/G1080). **More details at www.draytek.co.uk/acs**

Option 1: Self-Hosted (Software installed on your own server)

You install the VigorACS software on your own server and connectivity. You can create isolated sub-accounts for your customers' access to your server. You can resell the software licence wholly (i.e. the customer will install and run it). SRP is 35% higher than the trade price. Runs on Linux (recommended) or Windows. Speak to us for server specification requirements.

Option 2: Hosted by DrayTek UK (Cloud)

Ideal for quick deployment with no need to run your own server/connectivity. For dealer's own use or order & resell separate subscription accounts for individual customers so that they have their own isolated accounts and access (Premium version only).

Subscription Pricing (Annual)

No. of Nodes	Self-Hosted Premium Per node/annum		Cloud Premium Per node/annum	Cloud Standard Dealer Use Only (Max. 500 nodes) One account per dealer.
	NEW	RENEW		
5-19	N/A	N/A	£6.00	£0.00 (Free!)
20-99	£5.00	£4.00		
100+	£4.50	£3.60	£5.00	
500+	£3.50	£2.80		n/a

For all subscription types, mid-term node number increases (min 5) are charged pro-rata for time remaining, minimum charge of 30% of the full annual cost or £10 (whichever is greater).

The 'Cloud Standard' account subscription is for dealer's own use only to support clients' devices (3rd party admin access is not permitted). One account per dealer. You must have at least three active nodes. Version Comparison, see www.draytek.co.uk/acs-compare

IMPORTANT : Vigor ACS-SI Version V1 support ended in Dec. 2019; V1 is now be obsolete and not receive updates and should not be used. Upgrade is FOC during your subscription term. VigorACS2 will go EOL at the end of 2022 and support will end in 2024. Upgrade to VigorACS V3 is FOC for active subscriptions. Please contact support if you need help/advice.
